

Blue Ocean Initiative

Systematically creating growth beyond the competition

Red Oceans are industries with defined and accepted boundaries where companies try to outperform their rivals and grab a greater share of existing demand – leading to “bloody” competition with low profitability. Blue Oceans denote the unknown market space, unexplored by competition, that provides an opportunity for profitable and rapid growth – which you want to explore for your company!

enable2grow is helping you and your company to move from the so-called “Red Ocean” to a “Blue Ocean”, the analogy for the wider and deeper potential of unexplored market space. We apply the proven Blue Ocean strategy framework, developed by Kim and Mauborgne and start with a tangible innovation initiative in your organisation.

We guide your team through a step-by-step process with proven tools

- Value curve: visualise the current competitive situation of your offer
- Buyer Utility Map: discover the pain points of your buyers
- Three categories of non-customers: identify the total demand of your business
- Six Paths Framework: uncover commercially compelling blue ocean opportunities
- Eliminate-/ Reduce-/ Raise-/ Create-Grid: more customer value – fewer costs
- Blue ocean expo: test, decide and implement with your organization

“The Blue Ocean Initiative delivers by opening new markets for your company with a unique customer value, creating higher profitability with increased customer value at lower costs and a blue ocean mindset for your organisation.”

Dr. Bernd Brockmeier | Senior Advisor and Expert for Design Thinking & Innovation

Bernd has extensive experience in the field of business development – in multinational companies, SMEs and startups. He has served as Sales and Marketing Director, Managing Director, Interim Manager, and Operating Partner for investors as well as advisor and coach.
