

The TinyBox Think Tank with enable2grow GmbH

The ultimate workshop for innovators and changemakers to
plan future-proof strategies

The TinyBox Think Tank is a corporate-sponsored executive event, hosted and moderated by experts with a group of peers who want to discuss changes in leadership, emerging technologies, and global challenges. In the think tank, you can discuss your ideas with leaders from across the globe to share your knowledge, gain unique insight and develop solutions for the future.

We kick start the process by delivering the tools you need to build and increase innovation, by understanding how your industry is changing and by finding new untapped market opportunities, so you can:

- Gain valuable insights from competitors, collaboration partners, and potential clients
- Create your own source of unique, event-generated content for the coming year
- Establish credibility as a thought leader with “blue-sky” ideation and innovation
- Increase visibility with a coordinated communication strategy to increase leads

“Due to the calibre of our global C-level participants, each think tank generates a comprehensive and insightful report for immediate actionability, therefore as a Think Tank Member, we help you maximize your visibility and impact.”

Raj Hayer | Senior Enabler, Communications and Market Research Expert

Raj has led strategic planning efforts for customer experience, human capital transformation, and change management, defining crucial metrics to ensure sustainable business growth. She is an expert at leveraging market research and think tanks for successful market entry and growth initiatives. → [in](#)
